## EDUCATION

---

B.S.C Computer Science, Bauchi State University, Nigeria      march 2023 – till date

## PROJECTS

---

### Movie Blog Website

June 9, 2024

In this project, I build a movie blog website using frontend development and the important JavaScript libraries like react and api request for the movie database.

- Project Steps: Importing the necessary JavaScript libraries and the dataset.
- Request for an api key to fetch movie database.
- Input jsx file on how the page will display, add search input.
- Bootstrap and CSS for styling.

### Medicine Production Company Website

June 14, 2024

In this project, I build a Medicine Production Company Website using UI/UX design

- Project Steps: Sketch the wireframe using Figma.
- Use web flow to customize the webpage.

### Cosmetic Website

June 26, 2024

In this project, I build a cosmetic website using JavaScript library like react.

- Project Steps: Create vite, install JavaScript library (react).
- Input jsx file on how the page will display.
- Bootstrap and CSS for styling.
